WE ARE LOOKING FOR OUR NEXT CHANGE-MAKER

UPSTREAM BIOPROCESS SCIENTIST

At Univercells, we are on a mission to make health equally accessible to all. We work every day to reinvent biomanufacturing processes, and develop or integrate the next innovative technologies.

Through the combination of process development and engineering expertise, we create synergies to deliver game-changing production capacities to achieve our mission: Biologics available and affordable to all!!!

This job is the perfect opportunity to contribute to our mission and be impactful.

Here, within the Biopark Charleroi Brussels South (Belgium), you will join a collaborative team full of passionate change-makers. You will be actor of the successful development of a smart and continues innovative upstream process. You will select and implement the most efficient technologies enabling to simplify and optimize the upstream operations. Working closely with the downstream and engineering teams, you will also facilitate the integration of the cell culture process into a completely disruptive continuous production line.

Is it appealing to you? Are you a powerful thinker combined with an efficient doer? Do you excel in bioproduction and upstream processes? Let's meet!

Start your journey by dropping us an email at job@univercells.com

● RESPONSIBILITIES

- Identify efficient upstream technologies for vaccine, gene therapy and biosimilar applications
- Challenge candidate technologies to deliver value from R&D to manufacturing use
- Design, plan and execute upstream experiments for various projects
- Perform the analytical tests related to your experiments
- Exploit and present data to orientate the next steps of the project
- Write documentation associated to your experiments

● QUALIFICATIONS

- Master in Biology/Biotechnology
- Experience in upstream technologies and analytical methods
- Understanding of the development, scale up and implementation of bioprocess upstream technologies
- Solid data analysis capacity
- Strong organizational skills
- Fluent English required
- Proactivity and flexibility
- Team spirit
- Self-motivation and interest for start-up companies/SMEs
